SERVICE BULLETIN: SB11601E, Measure of Lift Jack to Ball Nut Clearance

FROM: MAXFLIGHT CORPORATION
FAX: 732-281-2009
VOICE: 732-281-2007 x 222

MESSAGE:

Affects all VR2002E, MT3000E, and FS2000E all electric simulators, manufactured by MaxFlight Corporation.

A measurement must be taken with the unit completely lowered. The measurement we are looking for is the space between the Action Jack (Lift Jack) base (top of) and the Action Jack Ball Nut (under side of the Jack cover). You may have to use a feelers gage.

INSTRUCTIONS: Please respond to this bulletin with the dimension for both left and right sides.

Please ensure the unit is completely lowered when taking this measurement and respond back to us immediately.

Non-compliance of Service Bulletins adversely affects warranty and liability issues.

Please confirm receipt of this SERVICE BULLETIN by faxing this cover page with your signature on bottom line to MaxFlight Corporation at +1(732) 281-2009 within two days.
